

BIOSOLVE SPILL RX

BIO-BASED OIL SPILL DISPERSANT AND CLEANER
(TYPE 3 & 2)

Approved and accredited by the Philippine Coast Guard
and by the Maritime & Port Authority (MPA) of Singapore

Importance of BIOSOLVE SPILL RX

BioSolve Spill Rx is a plant-based oil spill dispersant. It breaks down oil into tiny droplets for easier cleanup in oceans and on various shorelines. Safe for marine life and the environment, it's effective in hot weather and doesn't sink to the ocean floor.

HOW IT WORKS

ADVANTAGES

Reduced fire risk:

The significantly higher flashpoint compared to the minimum requirement ensures greater safety during handling and application, minimizing the chance of accidental ignition.

Aquatic life protection:

The low toxicity to aquatic life, surpassing the minimum survival rate, indicates minimal harm to marine organisms, promoting environmental responsibility.

Enhanced safety:

Approved and certified by Maritime and Port Authority of Singapore (MPA) and also Philippine Coastguard (PCG)

Environmental friendliness:

The high biodegradability rate exceeds industry standards, ensuring rapid breakdown of the product and minimal environmental impact after use.

APPLICATIONS

Shoreline

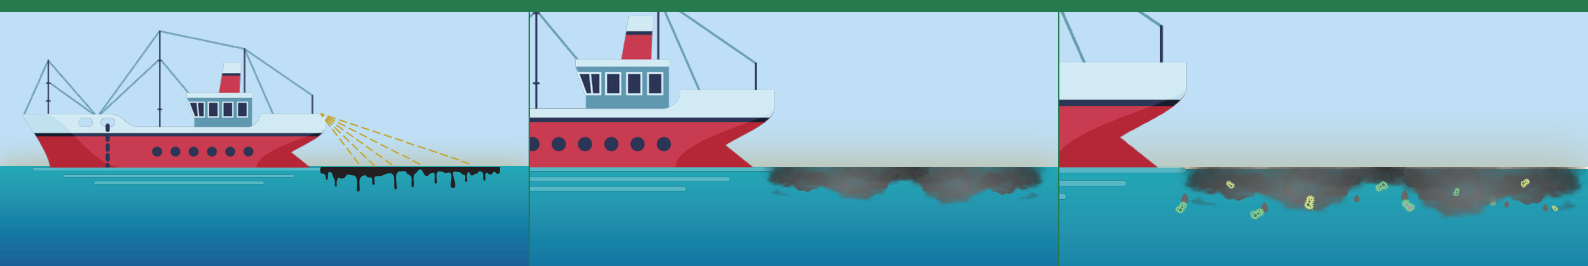

Sea Surface

Industrial Plants

Mangrove

Ship Deck

THIS IS HOW WE TREAT OIL SPILLS

BIOSOLVE SPILL RX is sprayed onto the oil

BIOSOLVE SPILL RX molecules migrate to the oil/water and reduce surface tension, allowing small oil droplets to break away from the slick.

Oil droplets disperse by mixing from natural currents and are ultimately degraded by naturally occurring oil-eating microbes

Product Technical Data

Form: Oily Liquid
Viscosity @ 40°C, cSt: 2 - 5
Specific Gravity @ 25°C: 0.84 - 0.88
Flashpoint, °C: 100 min

Product Packaging

Available in 20 liter pail, 200 liter drum or bulk.

Shelf Life

2 years, minimum
(quality can be rechecked annually)
